

Name	Bitmap to 3D lost resolution
Reporter	Jacob P
Submit Date	11/02/19
Product	OpenOffice Impress
Build	04/01/07
Summary	Images distort when converted to 3D and back to Bitmap
Platform	Microsoft Windows 10 Home
Operating System	10.0.18362 Build 18362
Severity	Minor
Priority	Low

#### Description:

Converting image types from bitmap to 3D compresses the image, adds a shadow, and loses resolution when converted back and forth.

#### Steps to reproduce:

1. Insert>Picture>From File
2. Right click image> Convert> To 3D
3. Right click image> Convert> to Bitmap
4. Repeat 2 and 3

#### Expected Results:

The image should revert back to the previous Bitmap when converting from 3D → Bitmap.

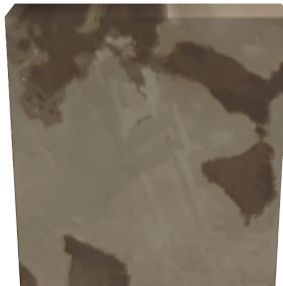

#### Actual Result:

The image merely converts the now 3D image into a Bitmap of the 3D image. This compresses the image and adds a shadow effect from converting it to 3D.

#### Screen Shots:

converts to  
after 1 run

converts to  
after 5 runs
